City, State - San Mateo, California

In the movie The Reader they make a comment about the Holocaust how everyone knows about a situation but they still let many, many people be murdered. The analogy of this situation is no different than the horrific Holocaust like conditions occurring in the U.S. Court System and society.

I am a court crime victim in the San Mateo Superior Court in California and Supreme Court of Ulster County in New York, in a Fraud On The Court. I was harmed tremendously while many in high positions of power watched me be robbed, physically injured, and I had every right imaginable continually violated trying to push me into homelessness and poverty. My 18 year marital rights even terminated by fraud.

I became vocal to many in society about these abuses especially to politicians, all members of the Judiciary, Judicial agencies such as The State Bar, Commission on Judicial Performance, The Office of the Clerk of The Supreme Court whom does The State Bars job but far from effectively in California, Grievance Committees, Media, Rights Agencies, District Attorneys Office, County Attorneys, The F.B.I, Justice Depts. to only learn everyone knows these issues exist and NO ONE will help you, let me repeat NO ONE. Everyone knows it, is involved with it, and they all are allowing tremendous organized crime and harm both emotionally and physically to citizens and society.

The only person, only person whom responded and understood how tragic these circumstances to needlessly harm individuals and families was Elie Weisel, a Holocaust survivor. What exists is tragic and appalling, it is torturous victimizing conditions where

no procedures and protections exist for the public. Conflicts of interest are rampant, the whole system is a charade of bogus hearings to imprison families to steal and force people into homelessness and poverty. Justice, honest judges, and attorneys are rare. Pure organized crime and racketeering exists. This is terrorism and treason as this sham appears run by the mafia or another country with the U.S. The ignorant lack and disregard by politicians and Congress in Washington, D.C. to review Article I & III tribunals by saying there is a firewall is ludicrous. Judicial Immunity must be repealed as many judges are involved with this organized crime and take bribes and payoffs.

Adversarial processes used mainly in family law are a complete violation of property rights to keep families in the courts for years. In addition, it causes undue stress, duress, and highly traumatic incidents to families violating human rights. Domestic violence, child custody false allegations, parental alienation, and theft of children by CPS can be identified in relationship to this process. Adversarial processes must be banned in all aspects of law; this is a form of water boarding and torture. Slavery and confinement to steal is the premise behind these incidents, plus the violation of rights!

I work in communities and do a variety of healing work to reduce the effects of trauma. The circumstances in these courts are about inflicting trauma, which is tyranny. This public health crisis that exists to harm individuals both emotionally and physically, plus tries to force people into poverty, is this for the U.S. Government to pick up the tab, control the people, aid the drug co.'s or increase medical costs? For a society so educated this is barbaric. No one should be in poverty in this country, look how much money you all wasted on this election. Change to the political arena is needed too! There are no ethics, accountability, nor responsibility by anyone. Though many have violated

all my rights, I still take a stand for all rights, my Human Rights the most precious.

I became so vocal I subpoenaed the Governor in my state for my civil trial against my attorney whom not only defrauded me but also defrauded the courthouse with identity theft and fraud with a judge in California. My Constitutional Rights for due process were violated for this trial; I even spoke with the Deputy AG that day. It appears a payoff was made by a big insurance co. and law firm to the judge(s). Every judge in that court knew I was defrauded and they kept harming me. I now hold the Governor, his offices, and the insurance co. fully responsible, as they have been the ones to help force me into poverty knowing what they knew. I sustained two physical injuries and these parties have reflected reckless endangerment and intent to harm me physically again. I have every right to defend myself against such treasonous cowards. My two self-employed businesses were destroyed while my cases grew from one to four due to corruption.

A niche is carved out by these corrupt judicial agencies and courts where the police do not act. My New York case happened due to the inability of the California court to divide property, theft, all parties aided and abetted my fraud crime. A home I fought in foreclosure is filled with crime plus a payoff to a County Clerks Office by an attorney. The falsehoods created by the Fed and banks are far from truth and reality. President Obama you are a Civil Rights Attorney, I certainly hope I see action on your part and the DOJ. The Fed and The State Bar's are private corporations that need abolishing in this country they have no allegiance to Americans at all. So what country has invaded America's soil? These foreclosures should be halted and all parties whom lost a home should be refunded for the abuse created by the U.S Government. Debt collectors should be abolished, another bunch of crooks with no contract as write-offs are taken by the

banks. Due to the manner in which banks sold their loans on homes they are only service providers with no right to anything, no contract exists. How many home foreclosures were thefts, all of them? Go back to allodial titles and land patents these cases are frauds. Community property laws are non-existent and review the crime in bankruptcies.

I command indictments, my rightful property, payment for my harm, and my punitive damages that the court tried to drop off and steal to get the insurance money, NOW - Governor! Big business and harm to citizens is a major issue. Workmen's comp. cases or accident victims sustain greater injury in these courts. Judges overturn judgments by juries, parties do not get judgments paid out, plus all the estate theft shows U.S. Government agencies appear one big fraud, I won't comment on taxes. Honest attorney's trying to help get blacklisted and harmed by the State Bars. The U.S. Government is a shamble of frauds, lies, abuse, mismanagement, and injustice. I take a stand on all my inalienable rights for myself and all Americans. It is about time you all Wake Up To Life, Become Accountable, Take Action Against Corruption, Rights Violations, and Treason to All Americans! Crimes compound when JUSTICE IS UNJUST! The lacking authority by the Governor and DOJ should be addressed. My story can be viewed on www.myinnertransformation.com under news.
